PREPARATION OF POLYETHYLENE OXIDES BY
POLYMERIZATION OF ETHYLENE OXIDE. [1961]
[10]p. 20 refs.

Order from OTS or SLA \$1.10

62-13839

Trans. of Vysokomolekulyarnye Soedineniya (USSR)
1960, v. 2 (no. 12) p. 1832-1838.

DESCRIPTORS: *Ethylene oxide, *Polymers,
Preparation, Polymerization, Catalysts.

Two methods of preparing polyethylene oxides were
developed: by polymerization of ethylene oxide in an
autoclave under pressure and by bubbling gaseous
ethylene oxide through alkaline solutions of the glycol
in apparatus of the column type. The composition of
the polyethylene oxides and their properties are de-
termined principally by the ethylene oxide: water and
ethylene oxide: glycol ratios. The molar ratio of

Odessa's advantageous economic-geographic situation
has played a positive role in all phases of the city's
development. It has promoted Odessa's pre-eminent
place as a foreign trade center and its function as a key
element in the geographical division of labor. The
situational advantages of the city should be taken into
account in any historical-geographic study and in in-
suring more rational economic relations between the
city and the rest of the Soviet Union. (Author)
